Shape the

Future of Learning

FRIENDER BRAND STORY

Friender is an EdTech brand that reimagines the essence of education through AI and VR technology. A learning environment where teaching and learning grow together — that is the very reason Friender exists.

Innovation

We introduce new learning experiences that go beyond the limits of education through AI and VR technologies.

Creativity

We provide creative, integrated learning where students think and express themselves independently.

Engagement

We build a field-driven learning culture where students immerse and teachers grow alongside them.

Sustainability

We establish a sustainable educational ecosystem that supports the growth of future generations.

Connecting Imagination to Learning

INNOVATION & CERTIFICATIONS

We create new value where technology and education meet.

Social Venture Certification

Pre-Social Enterprise Designation

Corporate Research Institute Accreditation

Startup Company Verification

Trusted Certification Framework

- Company credibility proven through official government and institutional certifications
- Professional capability built on both technological expertise and social responsibility
- A system designed to continually strengthen quality and trust

VR Educational Content Development

We create immersive learning content that allows students to experience subjects difficult to explore in real-world settings.

- VR World Exploration
 - VR Environmental Science Experience
 - Drone Mobility Flight Training
- 01** Planning and developing immersive VR content across science, environment, culture, arts, and more
 - 02** Providing curriculum-linked and experiential VR learning modules
 - 03** Supplying and operating programs for elementary, middle schools, and public institutions
 - 04** Includes actual classroom scenes and images of students using VR devices

AI Creative Education Services

We provide AI-powered creative learning experiences where students think and express themselves independently.

- AI Storybook Creation
 - AI Invention Experience
 - AI Debate & Communication Training
- 01** Developing hands-on programs such as AI storybooks, image and voice generation, and interactive learning tools
 - 02** Operating customized creative-AI kits and online content for elementary and middle school learners
 - 03** Researching data-driven learning analytics and feedback systems

Instructor Training & Certification Programs

We train professional instructors who lead AI-VR convergence education and operate a structured certification system.

- Creative Convergence Instructor Training
- VR-AI Specialist Instructor Education
- Private Certification Programs (Level 2 & Level 1)

- 01** Practical, hands-on training for prospective instructors and in-service teachers
- 02** Step-by-step curriculum designed with real classroom feedback
- 03** Professional certification system through course completion and qualification exams

IT Solutions & Platform Development

We support digital transformation for companies and institutions—from web/app development to integrated solution building.

- Customized Web-App Development Services
- User-Centered Platform Planning & Operation
- AI-Based Solutions for Higher Work Efficiency

- 01** Designing tailored platforms that meet industry-specific needs
- 02** Creating intuitive UI and user-friendly digital environments
- 03** Providing one-stop development services from planning to operation

PROGRAMS

Learning Through Technology, Growing Through Imagination

Friender delivers immersive VR learning experiences where students learn by doing. By recreating themes like geography, environment, and aviation, students go beyond watching and gain understanding through hands-on exploration.

VR World Exploration

An immersive travel program where students explore global culture and geography through VR.

- Virtual cities and landmarks that expand global awareness
- Geography · Culture · Environmental Understanding
- Student-driven exploration activities

VR Environmental Science

A scientific VR experience where students experiment with environmental issues and explore possible solutions in virtual space.

- Environmental VR content on ecosystems, climate, and energy
- Activities focused on scientific inquiry and problem-solving
- Linked with STEAM education (Science + Technology + Art)

Drone Mobility

A hands-on learning program combining VR flight simulation and real drone control to explore aviation principles and the joy of flying.

- Learning drone principles, safety, and piloting basics
- VR flight training paired with actual drone practice
- Enhances logical thinking and spatial reasoning skills

PROGRAMS

AI Creative Learning Programs

Friender offers creative, AI-powered learning programs where students think and express ideas independently.

By using AI-generated images, language, and data, students build their own ideas and develop creativity, problem-solving skills, and expressive abilities.

AI Storybook Creation

A creative writing class where students use AI-generated images and text to build and complete their own stories.

- Hands-on participation from story planning to illustration
- Writing and image-generation activities using generative AI
- Enhances imagination, expression, and creative thinking

AI Career Exploration

A self-understanding-based program that uses AI analysis to identify students' interests and explore future careers.

- AI-based assessment of career tendencies and strengths
- Personalized job recommendations using big-data insights
- Builds self-directed career planning skills

AI Invention Project

A convergence-based invention class where students identify problems and design solutions using AI tools.

- Exploring everyday problems and proposing AI-driven solutions
- Developing ideas through team-based project work
- Strengthens creative problem-solving and collaboration skills

Instructor Training Program

Friender trains creative convergence educators who can respond to the evolving landscape of education.

Training Fields

AI·VR, coding, arts, STEAM, and other convergence-based education areas

Training Format

Combined offline practice and online learning

Certification
System

Structured Instructor Curriculum

- A step-by-step training system covering theory, practice, and evaluation
- Customized curricula by subject area
- Growth-focused learning supported by practical feedback

Field-Based Instructor Development

- Hands-on classes for prospective and active instructors
- Teaching methods designed with real classroom needs
- Placement and certification pathway available after completion

Certification Programs

Friender operates private certifications across AI, VR, coding, arts, psychology, and creative learning.

Through these programs, we train specialized instructors and reinforce the credibility of educational quality.

Certification Categories

Our 11 private certifications formally validate expertise in convergence education.

Arts · Physical Education	Academic · Language	Creative Convergence	Information · Technology
Rhythm Sports Sports Educator Martial Arts Sport Creative Art AI Storybook Art Healing	Play English AI Creative Learning	VR Convergence AI Creative Application	Computer Literacy Creative Coding

Certification Management System

We maintain credibility and sustainability through a structured training and evaluation process.

- Each certification consists of Level 2 (Basic) → Level 1 (Advanced) examinations
- A systematic process of training → assessment → examination → certification issuance
- Online record management and renewal system in place
- Private certification system operated by an institution approved by the Ministry of Education

Benefits of Certification

Certification provides official recognition of expertise and expands opportunities for fieldwork and employment.

- ✓ Official verification of professional instructor competency
- ✓ Opportunities for placement in schools and public institutions
- ✓ Nationwide instructor network for joint program operation
- ✓ Improved educational quality through a standardized qualification system

Educational Field Applications

We deliver AI·VR convergence programs, creative coding, and arts-integrated learning across elementary and middle schools as well as public institutions nationwide. Based on continuous feedback from real classrooms, we refine and advance our content.

Program Areas	 AI·VR, coding, arts, and the full spectrum of convergence education
Teaching Formats	 Customized programs for regular classes, after-school sessions, and public institutions
Outcomes · Implementation	 Program improvements and expansion to new schools and agencies
